Critics - book review

JFK and JFK assassination records up sale. Harold Weisberg 6/19/80

As is true in most cases, there is overlap between my JFK and FBI records requests - in all cases considering the misuse made of these records by the FBI, for its special political purposes. Historical references to my alleged JFK and FBI records pertinent to it are included in the JFK assassination records to which I refer.

Two of my appearances arranged by the FBI at network expense were on WRC-TV, New York, and WAVA radio, Arlington, Va. The radio station is in the Richmond/Alexandria office territory. I filed requests of all 59 field offices. From what the FBI refuses to so "un established source" at the TV station it obtained both tape and transcript of the "Minority Report" broadcast, later syndicated. (62-109060-4555). While 62-109060-6586 is a tape of the WAVA broadcast, other records indicate that the recording was done on a Sunday by the lab and that a transcript, not provided, was made. Pertaining to the Minority Report, serial 4253 states that the Domestic Intelligence, Laboratory and General Investigative Divisions are to review the transcript and provide rough drafts of reviews, which the Criminal Section of GID was to coordinate and incorporate in a rush memo. (This is a function of the lab to which I've referred in earlier and ignored appeals - not the usual laboratory function.)

Those drafts have not been provided under either request. [redacted] as the normal function of the Civil Rights Section of GID would not appear to include "reviewing" transcripts of broadcasts of critics of the FBI, later to be coordinated with other such reviews by a different part of GID.

More than a decade has passed and in some respects my views have changed as I've learned more - often from previously withheld records. In some respects the FBI disturbs. Regardless, I am anxious to preserve all possible, including any unfaithful FBI representations, for the future. I therefore desire what is withheld.

The tape recordings are FBI, the serials are memos. With the Minority Report every place where there was rebroadcast where there is a field office may have pertinent records. Initial broadcasts were in New York and Washington (WRC), where a well-known

FBI "contact"/agent was very aggressively pursuit, her sycophancy underlined by her public demeanors. Other records reflect the fact that Lindsay was used in the JFK propaganda activities by the FBI.

He, at least did not provide 4335 in response to my PA request. While it does not mention my name, or the other names, the other pertinent records do. It was not possible for Mr. Lesar to locate the other records referred to in this memo in what was provided under my request.

While the NSA memo, 9546, is included in my PA response, the list was not. A check of NSA response discloses nothing was provided. What was used as the basis for 9546 also was not provided.

It is apparent, not for the first time, that the Secret dislike not merely those of the Laboratory to explain/reconcile not made to comply with both my PA and subject-matter requests and this appeal does include the failure to make such searches.
